

Inner West Busway along Victoria Road

IMPORTANT INFORMATION

PLACEMENT OF TEMPORARY SPEED HUMPS ON HENLEY MARINE DRIVE, DRUMMOYNE

A number of enquiries have been received about the recent placement of speed humps on Henley Marine Drive, between Formosa and Cary streets.

These speed humps have been temporarily installed on Henley Marine Drive to slow down traffic and enhance pedestrian safety in the area.

Safety and access for pedestrians

The footpath on the southern side of Henley Marine Drive located between the work site driveway and the ferry wharf path will be temporarily closed for approximately three months. Closure of the footpath is the safest option for the public while work to build one of the bridge piers is undertaken in this area.

Safety and access for cyclists

Access for cyclists will be maintained through a one metre gap between the kerb and the speed humps on either side.

Signage and traffic controllers will direct pedestrians and cyclists safely through the work area. A 40km/h speed zone has been implemented near the worksite to enhance pedestrian, cyclist and worker safety.
