

## Inner West Busway along Victoria Road

30 June, 2010

### **IMPORTANT INFORMATION – Night maintenance and resurfacing works on Victoria Road, Drummoyne**

From Wednesday 30 June, the RTA will start pavement maintenance work along Victoria Road between Westbourne Street and Park Avenue in Drummoyne as part of the new Inner West Busway project. The work will involve strengthening and replacing some sections of the concrete road pavement prior to resurfacing Victoria Road. Resurfacing is scheduled to commence on Wednesday 7 July.

The work will be done at night, from Sunday to Thursday between 7pm and 6am, over a period of six weeks, weather permitting. Night work is required so that large sections of the road can be safely closed. This will allow the work to be done more quickly and to minimise the overall impact on traffic and the community.

Pavement maintenance work will include the use of:

- A concrete saw, rock-hammer and trucks to remove the existing slabs, and drills and concrete trucks to build the new slabs.
- Drills and a high pressure pump to strengthen the pavement and increase its service life.

The resurfacing work will include the use of:

- Crane trucks to remove the concrete median barrier.
- A profiling machine to remove the pavement surface and a paver and rollers to replace it. Trucks, mechanical sweepers and pavement marking machines will also be used.
- Forklifts and a hydraulic press to install the new moveable median barrier for the tidal flow system which will be introduced early next year.

#### **Noise**

Unfortunately, some work will be noisy. However, the work has been programmed so that the noisiest activities are not undertaken at the same location for more than two consecutive nights.

Some low noise activities such pavement marking, pressure grouting and the removal and installation of concrete barriers may continue at the same location for more than two consecutive nights. .

#### **Traffic**

During the resurfacing works, the RTA will introduce temporary 'No Stopping' and parking restrictions, close traffic lanes and intersections and redirect local traffic. For up to date information and maps showing the local detours, please visit [www.innerwestbusway.com.au](http://www.innerwestbusway.com.au)

When driving in the area, please follow the signs and directions of police and traffic controllers, including reduced speed limits.

#### **Access to properties**

Access to and from properties for pedestrians and vehicles will be maintained. Please advise our traffic controllers if you need to gain entry so you can be safely guided through the work area.

The RTA will contact potentially affected business owners regarding access to Victoria Road prior to work commencing in their area to discuss their access arrangements.

#### **Bus stop relocation**

Bus stops will be temporarily relocated. Traffic controllers will assist bus patrons as necessary.
