

# Inner West Busway along Victoria Road

FACT SHEET – APRIL 2009

## Catching a bus What to expect on completion

### Less time sitting on a bus

Dedicated bus lanes in peak periods, will give priority to buses and improve the travel times and reliability of bus services along Victoria Road through Drummoyne and Rozelle.

Bus lanes will operate as follows:

- AM peak - Citybound from Seymour Street, Drummoyne to The Crescent, Rozelle.
- AM peak - Westbound from Clubb Street, Rozelle to the end of the new bridge where it will merge with the general traffic.
- PM peak – Citybound from Seymour Street, Drummoyne to Terry Street, Rozelle.
- 24 hours - Citybound over Iron Cove Bridge between Park Avenue, Drummoyne and Terry Street, Rozelle.

### Changes to bus stops

A bus stop strategy considers the best locations for stops for buses, bus users and travel times.

Some bus stops will be relocated. Bus stops to be removed include:

- Seymour Street, Drummoyne (citybound).
- Tavistock Street, Drummoyne (westbound).

Bus stops to be relocated include:

- The two bus stops at Evans Street and Robert Street, Rozelle (citybound). These will be replaced by a bus stop between Evans and MacKenzie Streets, Rozelle.
- The two bus stops at Church Street and Edwin Street, Drummoyne (westbound). These will be replaced by a bus stop between these two streets.

### Will there be more buses?

This project will improve bus travel times and reliability and enable existing services to accommodate more trips. Bus infrastructure is being considered throughout Sydney as bus use increases.

### New bus bay at Cary Street

A bus bay at Cary Street will allow 'through' buses to pass buses stopped to pick up passengers. It will also improve safety for pedestrians and commuters. It will operate during the AM peak and include a bus shelter and a widened footpath.

### AM peak closure at Cary Street

During the AM peak, cars will not be able to turn left onto Victoria Road from Cary Street.
